

M2008 Tester Kit

The portable self-contained 145kN M2008 Heavy Duty Tester has been designed to meet the demand for proof load testing of larger construction fixings.

A lightweight triangular shape aluminium load spreading bridge has been designed specifically for the M2008 tester and directs reaction loads away from the fixing, this combined with the tester weighs only 14kg.

Load application is achieved via a ratchet handle driving a hydraulic multiplier and the applied load is recorded on a digital gauge which is integral with the tester.

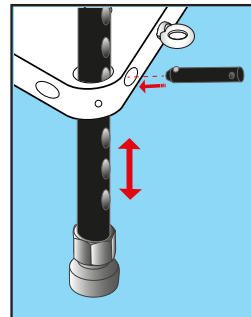

M2008 KIT CONTENTS

- Model 2008 Tester Body
- 0-145kN Dual Scale Digital Gauge
- Offset Load Spreading Bridge with 10mm eye hook
- 3 Telescopic legs with fully adjustable swivel feet
- 5 Threaded Adaptors M20> M12, M16, M20, M24, M30
- 400mm Connecting Rod M20
- M20 Adjustable Nut
- 24mm Ratchet Spanner
- Spirit level
- Allan Keys & spare screws
- Carrying case
- Full operating instructions
- Calibration Certificate

M2008 FEATURES

- Three fully adjustable telescopic legs offer 11 height positions 25mm apart

- New design case with telescopic handle and wheels for easier transportation.

Applications

- Proof and failure load testing of most fixing types
- High load expanding and resin anchors
- Cast in sockets and channel
- Holding down bolts for stanchion base plates
- Base plate fixings for column lighting
- Anchorage for crash barrier and safety fences
- Anchorage for stadium crush barriers
- Bridge parapet anchors

Compatible with the latest Hydrajaws Bluetooth Digital System.*

Record results digitally using the Hydrajaws App and manage results and reports from a remote online dashboard
